Mr. James Barry
Office Manager
Sporlan Valve Company
7525 Sussex Avenue
St. Louis, MO 63143

Dear Mr. Barry:

Attached is a Notice of Violation (#03799) for failure to comply with the Missouri Hazardous Waste Management Law and Regulations. An inspection conducted pursuant to Section 260.375 (9) RSMo. at the Sporlan Valve plant located in Washington revealed several violations. On July 22, 1983 a letter of warning with compliance dates for correcting the violations was sent to Mr. Vern Krimmel. Since that date additional correspondence has been exchanged between the department and Mr. J. D. Boing.

Sporlan Valve has failed to develop and submit a Personnel Training Plan as outlined in 10 CSR 25-7.011 (3) (F) and (6) (B) 12 & 13. The training plan must include all personnel involved with the handling of hazardous waste. Sporlan Valve has also failed to submit a list of emergency equipment with the location, physical description, and capabilities of each item as required by 10 CSR 25-7.011 (5) (C). In addition, Sporlan Valve has failed to adequately answer questions posed in the department's November 21, 1983 letter regarding past hazardous waste disposal practices.

By January 13, 1984 Sporlan Valve must submit an approvable Personnel Training Plan, a list of all emergency equipment (its location, description, and capabilities), and answers (and documentation) to the questions posed relating to past hazardous waste disposal practices. This information should be sent to Ms. Sandra Carroll of this office and to the St. Louis Regional Office. If this information is not supplied by January 13, 1984 further enforcement action pursuant to Section 260.410 RSMo. will be initiated.
